Keynote speakers from The Ohio State University, UW-Madison, and Mayo Clinic focused on team science at multiple levels of collaboration. A panel of UW-Madison investigators with expertise spanning the translational research spectrum discussed leadership approaches to fostering successful collaboration among members of interdisciplinary research teams. Speakers included:

- **Rebecca Jackson, MD**, Director, OSU Center for Clinical and Translational Science
  *Found in Translation: Creating the Optimal Team to Spur Innovation*

- **Panel Discussion: Sanjay Asthana, MD; Caprice Greenberg, MD; KyungMann Kim, PhD**
  *Leadership Approaches to Foster Interdisciplinary Collaboration in Teams*

- **Denise Ney, PhD**, Professor of Nutritional Sciences, UW-Madison
  *Translating Discovery to Practice: Glycomacropeptide Provides a “Whey” Forward for PKU*

- **Sundeep Khosla, MD**, Director, Mayo Clinic Center for Clinical and Translational Science
  *Team Science at a Programmatic Level*

Cosponsored by:

- Midwest Consortium for Education and Research Collaboration
- Midwest Area Research Consortium for Health (MARCH)
- UW Institute for Clinical and Translational Research
