ACTIVITY: Can MRSA Be Controlled?

OBJECTIVES: Discuss control issues regarding MRSA
Discuss strategies to control the spread of MRSA

SPEAKER: Dr. Dennis Maki, UWMSPH / UW HC Infectious Disease

Post-Program Questions:

1) The most striking phenomena of the antimicrobial area is resistance with the greatest threat to health being MRSA.
   True ☐ False ☐

2)  *Staph aureus* is seen in prototypic disease such as:
   a) ☐ Furunculosis
   b) ☐ Endotoxin food poisoning
   c) ☐ Endocarditis
   d) ☐ Osteomyelitis
   e) ☐ All of the above

3) Community acquired MRSA is an emerging global pathogen that is more virulent than the hospital acquired strain, but more susceptible to antibiotics.
   True ☐ False ☐

4) Certain populations are at greater risk of MRSA and may include:
   a) ☐ Athletes sharing towels, having skin to skin contact resulting cuts
   b) ☐ Inmates in jails and prisons
   c) ☐ Patient admitted from nursing homes or transferred from another hospital
   d) ☐ Patient with chronic renal failure or diabetes and on hemodialysis
   e) ☐ All of the above

5) Two key ways to prevent the spread of MRSA is hand hygiene and barrier isolation.
   True ☐ False ☐

Your constructive feedback is very important to us and will assist us in developing future activities. It is important that each participant complete and return an evaluation form.

Please rate the presentation and speaker(s) using the following scale:
5-Excellent; 4-Very Good; 3-Good; 2-Fair; 1-Poor
